

## ! CAUTION

- All wiring should be done by a licensed electrician in accordance with state codes, local codes, and National Electrical Code (NEC) or International Electric Commission (IEC) standards.
- Improper installation may result in serious injury and void warranty.
- Contains parts and assemblies susceptible to damage by electrostatic discharge (ESD).
- Surge protective devices should be utilized for fixtures installed in environments subject to power surges outside the specified operating parameters.

## Installation

*The provided safety cable can be used with standard HDL1, HDL2 and HDL3 fixtures (non-EMB).*

1. Insert eyelet end of safety cable between heatsink and driver housing.

2. Push eyelet end of safety cable all the way through and insert eyelet through loop end.

3. Pull eyelet end tight and attach eyelet to structure using M8 hardware.
