**ModCom® 2 – Phoenix’ Next Generation of Heavy Duty LED Floodlights**

**MILWAUKEE, WI USA - September 21, 2016** – When Phoenix introduced the ModCom® Series LED floodlight in 2011, it brought a new technology to the mining industry with light quality, efficiency and durability that hadn’t been seen before. Since then, Phoenix has continued to pioneer the LED revolution and is ready to unveil the next generation of the fixture that has impacted so many mine sites around the world - The ModCom 2!

The ModCom 2 Series has been reinvented for all the same applications as the original ModCom (and more) with half the weight and the size for easier installation, even better light quality and under HALF the price. It is available in AC and DC, has a variety of optic options ranging from wide flood to very narrow spot and is ideal for any surface mining equipment.

The ModCom 2 Series offers both 145W and 290W options emitting up to 13,500 and 27,000 lumens, respectively. The compact, durable design features a cast aluminum housing, powder-coated steel mounting harp and stranded wires for optimal protection against shock and vibration. The ModCom 2 is designed, engineered and manufactured in the USA and has a five-year limited warranty. It is UL listed to 1598 and 1598A, CE certified and has an IP67 rating. The ModCom 2 also has a clear tempered glass lens with an amber option.

For more information on the ModCom 2 LED floodlight, please watch Phoenix’ [video introduction](#) or visit the [ModCom 2 webpage](#).

###

Phoenix designs and manufactures superior lighting fixtures for the world’s harshest environments and has been serving the mining industry since the 1940s. The U.S.-based company has evolved alongside the city of Milwaukee and is still proud to call it home. Phoenix is known by mine operators all over the world as a manufacturer of innovative, high quality products that are supported with technical expertise and outstanding customer service.
