- Optional lighting control

Project Management

- U.S.-based team of experts involved throughout the process
- On-site project management
- Project commissioning

Installation Service Option

- Streamlined delivery of fixtures, rings and poles
- In-house, U.S.-based technicians for installation or assistance to a preferred contractor

Comprehensive Warranty

- 5-year standard warranty
- Extended warranty options available
- No limitations and no third party involvement

Why Choose Phoenix Lighting?

Customized Upgrade: From new wiring throughout the poles, to new electrical fuses and filters, you have the flexibility to upgrade the entire system, or just the lighting fixture.

A Perfect Fit: Whether you prefer fully integrated or remote mounted components, Phoenix will integrate our system into your existing requirements.

Superior Lighting: Work with a global leader in durable LED lighting solutions. With a product offering proven on container handling cranes, Phoenix designs and manufactures fixtures that meet lighting requirements, improve uniformity, reduce glare, and increase visibility throughout the facility.

Competitive Pricing: Phoenix offers **BAA (Buy American Act)** and **TAA (Trade Agreement Act)** price points to meet your project and budgetary needs.

Proven Solutions

Across a multitude of markets and regions - ports, airports, intermodal terminals and military bases use Phoenix's large area lighting solutions to improve operations and energy efficiency.

Hurlburt Field Air Force Range Avon Park, FL USA

New ramp lighting required a well-engineered and safe solution, and delivered the specified level of illumination allowing ground crews to rapidly rearm and refuel aircraft.

John F. Kennedy International Airport Queens, NY USA

An apron lighting retrofit and integrated lighting controls achieved 65% reduction in energy consumption and significantly reduced glare for pilots and ramp personnel.

Beaumont Federal Prison Beaumont, TX USA

Turnkey solution incorporating high mast poles, lowering rings and fixtures delivered to contractor. Installation completed on schedule with excellent lighting coverage.

PNCT Newark, NJ USA

A high mast lighting upgrade with Phoenix's Highland® Series resulted in over 50% reduction in energy consumption. With increased illumination levels, port personnel benefit from improved visibility for night time operations and cameras.
