

! CAUTION

- All wiring should be done by a licensed electrician in accordance with state codes, local codes, National Electric Code (NEC) standards and International Electrotechnical Commission (IEC) standards.
- Improper installation may result in serious injury and void warranty.
- Keep plugs and receptacles dry. This fixture should only be used on Ground Fault Circuit Interrupter (GFCI) protected circuits.
- Contains parts and assemblies susceptible to damage by electrostatic discharge (ESD).
- When using luminaires, basic safety precautions should always be followed to reduce the risk of fire, electric shock and personal injury. When used in wet locations, circuit(s) or outlet(s) must have GFCI protection. Receptacles with built-in GFCI protection should be used for this measure of safety.
- Maximum distance to the receptacle is determined by the length of the cord provided.

Included in the SturdiLED[®] AC Driver Kit: One (1) AC driver, eight (8) o-rings, eight (8) M4 socket head screws and one (1) wire tie.

Replacing the SturdiLED AC Driver

1. Disconnect power to fixture.
2. Loosen the eight (8) M4 socket head screws from the back cover (Figure 1, Item 1) using a metric allen wrench (not included). Remove back cover.
3. Disconnect driver.
4. Loosen and remove screws and washers holding driver bracket to cover (Item 2).
5. Loosen and remove nuts and washers holding driver to bracket (Item 3). Retain hardware.
6. Mount new driver with hardware removed in steps 4 and 5.
7. Attach wires from new driver.
 - Red to red
 - Black (from LED board) to blue
 - White to white
 - Black (from power cord) to black
8. Replace back cover and fasten with new screws and washers. Use screw pattern shown in Figure 2. Torque to 20 inch-pounds.
